EMS has many years of related experience within this area. We have carried out a number of restoration projects for national waste management companies, and privately owned projects.

These projects involve the restoration/regeneration of existing sites, involving the importation and handling of inert material, the placing of the material strategically.

Over the years we have dealt with in excess of 5 million cubic meters of inert material.

As global market conditions change so do our customer's needs, recognising this we are able to provide a complete support service including the following:

- > **CDM Management**
- > **Project Management**
- > **Feasibility Studies and Initial Costing**
- > **Plant and Equipment Handling and Installation**
- > **Turnkey Projects**
- > **Land Remediation**

When you hire EMS Group, what you get is Experience, Knowledge, Quality and Commitment.

You can rely on us to do the job on time, safely, efficiently and within budget. We offer a complete service by using our own team and our own equipment for every contract.

We work professionally, to a high standard, and pride ourselves on the repeat business generated.

Our clients range from Wildlife Trusts, Water Utilities, Commercial Developers and the Agricultural sector through to Private Landscape Projects.

We can undertake Restoration/Regeneration contracts throughout most of the UK. As our expertise has evolved we are increasingly involved at the concept stage of many projects. This affords our clients the ability to utilise EMS Groups experience in providing alternative methods of construction and materials used, whilst reducing cost and the impact to the environment.

Ever vigilant, we have adapted over the years to the constantly changing environment of the industry. Through our commitment to training and retraining of staff, the company can now boast of having a workforce who can achieve the best possible results in the shortest possible time with improved health and safety always as our main concern.

For all contracting quotes or queries, call EMS Group on 01942 248 156
