## **Our Industrial division specialises in the installation and relocation of industrial equipment, plant and associated services, a fully equipped fabrication shop, with a highly skilled team.**

EMS's resources not only involve the provision of experienced management and skilled staff, but also include a comprehensive array of fully certified plant and machinery equipment required to undertake the largest and most challenging projects.

Lifting, dismantling, rigging, moving, installing, of machinery and industrial equipment is carried out by a specialist engineering team.

We will deploy the above resources to various business sectors such as the following: Steel Industry, Automotive, Printing, Food and Drink, Aerospace, Pharmaceutical and Chemical, Nuclear, Gas, Petrochemical, Power Generation, Environmental and many other General Manufacturing sectors.

Here at EMS Group we're capable of fabricating any structural steel element and have provided high-quality structural fabrications for both the domestic and commercial sectors. We pride ourselves on our ability to produce precise and economic structural steel fabrications.

Whether you require an extension, building support or roofing steelwork, our years of experience in the steel fabrication industry means that we're well placed to offer professional advice and clear guidance on any project.

Working from our well-equipped factory we're capable of undertaking almost any bespoke structural steel fabrications – and working in-house, we're able ensure that from the initial design through to final installation, all our steel fabrications adhere to the highest standards and undergo strict quality control.

At EMS Industrial we are committed to a "Full Compliance Culture" giving health, safety and environmental matters the highest priority in all of our activities.
